

## **Learning Coach Preparedness Questionnaire**

*This is a list of questions to help you consider what you need to make UTVA work for you.*

What is my role in my student's education?

Does my student have all the things needed for an effective online learning environment?

*(A space to work, a working computer, internet, headphones and microphone, notebook and pencil, work, a space to keep school supplies, minimal distractions, etc) If not, what can we do today to better the learning environment in our home?*

Are there things that may distract my student that need to be put away until after school?

*(Example: Cell phone, video games, TV, reading book. If other people are using these things while my student is in school, can I make sure they are doing school in a different location so these aren't a distraction for them)*

What motivates my student? Would some kind of motivation or rewards system be helpful for us with school?

Have I set clear expectations?

*Examples: I expect you to be in live classes and will be checking in on progress on Tuesdays and Thursdays at 8pm. Video games can be played during lunch break and after school work is complete, Cell phone is checked in to me until after live classes.*

What is my student's biggest goal this year? What support do they need from me to meet that goal?

When will my student and I plan for the week?

Am I available to help my student with school work if needed? What time of day can I help? If not, is there someone else in their lives who can?

How often do I plan to check-in on progress? How will I let my student know of this expectations?

School should be 5.5 hours per day (for 2nd through 12th grades). What other subjects and activities does my student want to be learning?

Is my student getting adequate sleep?

What is our plan to get physical activity into the day?
